Onderdelenlijst Pim's Parts 2002

General information:

The fiat 500 was built in the following versions:

- Type D (Doors open the other way)
- Type Nuova 500, or F (round speedometer)
- Type L (Rectangular speedometer and bull bars)
- Type R (Round speedometer, 600 cc engine)
- Type Giardiniera (stationversion with horizontale engine)
- Further models like Gianinni, en Autobianchi

It is possible that your car a different engine or parts has (650 of 600) than original, most parts are interchangeable. Please quote the right details! Next to the parts is the abbreviation D;F;L;R;G;A(autobianchi) printed for the models (nothing is all models).

Although I try to get the best quality on the market chromium parts are subject to rust.

Therefore it is recommended to use blanc rust preventer inside and outside all chromium products.

All unused parts exept electrical parts may be returned, but bear in mind some small cost for administration.

Liability is limited to replacement of the car part purchased in case of a factory defect part.

B: follow direction Centrum, couted from the tramstop, after the 6^e traffic lights there is a ABN Amo-bank(left),
Turn right onto the Linaeuskade. After 200 meter at the right You will find the shop.

Be aware of payed parking, Downstairs we have limited parking space due to merchandisers trying to get in
and out. The entrance and the pathways should be kept clear at all times!

Public transport: Tram 9 Is the easyest, You ask for the Hema Middenweg!

I hope to see you soon in my shop!
With Compliments , Pim Sonnenberg
